WhalePower

TECHNOLOGY

“More Efficient Fan Blades Mimic Humpback Whale’s Flippers”

Our fans with WhalePower Technology will provide you with the latest in airfoil development, inspired by the tubercles on the leading edge of the flippers of Humpback Whales.

Tubercle Technology is more than just another blade design: It is a fundamental advancement in fluid dynamics which truly revolutionizes the Altra-Air HVLS ceiling fans. Just when the world needs it most.

The Tubercle Advantage

- * The Greenest HVLS Ceiling Fan on the market today
 - * Exceptional destratification & cooling
 - * Fans payback on average in 2 years
 - * 5 blades and more CFM's
 - * Less expensive to operate
 - * Up to 40% reduction in energy costs
 - * Lower decibel level
 - * Custom designs & colours

We also have a complete line of ventilation products including turbine ventilators, industrial curtains and the Absolute Air fan.
